

# High Dividend Europe Equity

2nd Quarter, 2010

## Investment Strategy Objective

RCM's High Dividend Europe strategy is an active equity investment strategy that implements a bottom-up investment approach to invest in high quality stocks with above average dividend yield, characterised by low valuation and rising earnings growth. Overall, the aim is for the portfolio yield to exceed the yield of the market by at least 1% and hence the strategy is best described as value investment.

## RCM Philosophy - Systematic

The mission of RCM Systematic is to deliver secure and stable performance by implementing disciplined and systematic investment solutions. The team's investment philosophy centres upon our belief that market inefficiencies can be exploited systematically by using well researched and disciplined investment processes that combine fundamental knowledge and sophisticated risk management skills.

## Investment Process

The High Dividend Europe strategy is process-driven and follows a three-step approach to equity analysis, utilising discrete screening, scoring and verification steps to identify those stocks with high and sustainable dividend yields. The initial investment universe is defined by applying several liquidity filters, depending upon other factors such as portfolio size. Typically not more than 20% of the average daily trading volume of a stock would be bought or sold.

## The RCM Advantage

- Generating consistent and stable outperformance through the use of proprietary RCM Systematic investment style research
- Innovative proprietary research platform generating bottom-up stock selection:
  - Over 60 sector-based fundamental analysts.
  - Grassroots® Research with a network of circa 300 independent journalists and field force researchers, with over 50,000 industry contacts.\*
- A successful track record since inception in 2003.
- A stringent and well-established investment management process, including effective risk control.
